The Parish School was the recipient of a Sullivan Foundation Grant in May, 2008. The grant provided the school with 27 new Dell computers loaded with XP and Microsoft Windows 2007. A new Lexmark printer was placed in the lab and networked to all second floor classrooms.

Computers formerly in the computer lab were moved into classrooms. The HP Laser Jet 40N Printer was moved to the first floor and

networked for classroom use there.

In June, 2008 a team of fathers met to make the move and prepare for installation of the new equipment. New carpeting and first floor wireless access points were provided by the Home and School Association.

Delco Consulting, under contract with the Office of Catholic Education, assembled the new lab.

Alexanders' Computer Services cleaned and upgraded all of our older PCs. Martin Deeney Associates rebuilt our server hubs providing internet connectivity throughout the school.

Archdiocesan grants have brought access to world wide video and research through Discovery Education and Net Trekker.

Field of Dreams Grows with New Roberts' Playground

In August of 2008, the OLC CYO parents welcomed the engineers of the Pennsylvania National Guard, who volunteered to assist with the resurfacing of the school playing fields.

After 10 days of hard work, two new baseball fields began to shape up. The project focused on improvement of drainage, clearing debris, and leveling of the surface.

In late September, the

landscapers arrived to seed the new fields. The contract has been set for the construction of fencing and backstops. Also in Spring, 2009, the football field will be renewed in the same manner.

A generous memorial grant from the Roberts family and an anti-obesity grant will bring Parish children a new school outdoor learning center and playground. The units include fitness

equipment, three climbing pieces, five slides, balance, fine and gross motor control sites and telescope, phones, optics and sound challenges for science study. Installation and dedication are set for December.

Exterior security was upgraded for the outside area with installation of fencing and surveillance
